

CAMILLA BARRE (PORTABLE VERSION)

DOUBLE BARRE. THE NEW COLLECTION OF DANCE BARRES.
STAINLESS STEEL BRACKETS WITH LOGO.
EACH BARRE LASER WORKED.

Antheo has created the new collection of portable dance barres. This collection is made of brushed stainless steel in order to guarantee the minimum maintenance from the wear and tear of time. In fact barres do not rust and are very resistant. Each barre is laser-worked to obtain a high level of Italian design that gives a harmonious and very precise finish. We have minimized the welding points of the various components which gives it an elegant look. The **CAMILLA** barre is equipped with a painted steel base of 25 kg with rubber wheels to allow an easy movement inside the room and it is also available with base without wheels weighting 10 kg. The double barre **CAMILLA** is at fixed height, this to allow an adequate use for both adults and children.

TECNICAL DATA SHEET

- Brushed stainless steel column of diam. 42 mm
- Heights of barre brackets: 75 and 102 cm
- Powder-coated steel base weighting 25 kg with rubber wheels /10 kg without wheels
